

# KODEN

## 7-INCH HIGH-RESOLUTION MARINE RADAR

# MD-3420Mk2/3441

MD-3420Mk2: 0.9 ft, 2 kW, Radome

MD-3441: 1.5 ft, 4 kW, Radome

### FEATURES

- **Convenient function keys and menu system**

By assigning frequently used functions to the two FUNC keys, you can promptly select different radar modes. The menu system also allows for easy selection of the different function choices.

- **The latest technology in pointing device**

A newly developed pointing device that is both watertight and dust-proof is used. This device enables you to make an easy and prompt selection of the variable range maker and other user functions.

- **Freely selectable range scales**

The optimum range scale to suit your present situation can be selected from a host of range scale choices available. No need to worry any more about the measuring distances.

- **Own track indication and picture mode selection make navigation easy.**

By connecting your navigation system and electric com-

pass or gyrocompass, you can display your own vessel's track on the display. North up, course up, head up and true motion modes are also available.

- **The location memory can be conveniently used for finding buoys and for rescue work.**

This system memorizes the location of your boat when the FUNC key is pressed. This function is especially effective for locating someone who has fallen overboard or returning to previously dropped buoys (connection to a navigation system is necessary).

- **Warning zone setting to alert you of closing events.**

By designating two points using the cursor, a flexible warning zone can be created. An IN and OUT alarm mode can also be selected.

- **Intermittent transmission watch**

The intermittent transmission function is located in the SAVE mode. This feature is particularly useful for watch keeping under reduced power consumption.
